| • Web Scraping | • GitHub     |                                  |                |

## Projects

---

### Online Food Ordering Platform (React.js, Node.js, Express.js, MongoDB)

- Developed a user-friendly food ordering website with features including user authentication, product selection, and order tracking.
- Utilized RESTful APIs for efficient data exchange.

### Chat Application (React.js, Node.js, Express.js, MongoDB)

- Designed and built a real-time chat application with user authentication and registration features.
- Utilized WebSocket technology for real-time chat functionality.
